Newsletter to Barossa Infrastructure Customers

Temporary Disruption of Service for 5 days from the evening of 1 May 2014

SA Water has advised that BIL service will be disrupted from Friday 2 May until Tuesday 6 May 2014, while essential repairs are carried out on the trunk main.

BIL customers are requested to completely turn off their connections on the evening of Thursday 1 May and not to take water until Wednesday 7 May 2014. Your cooperation will be much appreciated, as this will prevent air accumulating in the pipeline which often causes supply problems.

Temporary Trading of BIL Water in 2013/14

BIL has obtained a limited supply of additional water. This can be purchased at the Premium Water price of \$780 per Megalitre. Customers who have surplus water requirements should also register their water to avoid paying unused water charges. BIL will allocate water trades on a first-come basis. This will be shown on your next water account. If you need to confirm the trade, please phone the office.

Scheme Expansion

We have received a response from SA Water that allows for supply in 2014/15 commencing on 1 October. Contracts and flow availability will be forwarded shortly.
