

**Newsletter to Barossa Infrastructure Customers**

**Additional Water**

Customers with Off Peak water may take it immediately if required!

**Further Additional Water**

Barossa Infrastructure has reached agreement with SA Water to provide further additional water this season. The amount is limited and so customers can, initially, order up to 10% of their original contract amount rounded up to a whole Megalitre. If they want further water please indicate and this will be confirmed depending on demand.

SA Water has advised there may be some water quality issues as the reservoir is drawn down. These would include some we are already incurring such as turbidity and fish and may include acidification of the lower levels of the reservoir. BIL will test regularly and advise on the web site these results.

This water it will be charged at \$740 per Megalitre

Please complete the form below post, email or fax it to our office.

All volumes in full Megalitres please

Customer Number	Property ID	Contract Entitlement Premium + Off Peak	Volume of Off peak to be taken prior to 1 April 2013	Additional Water Required (max 10% of entitlement)	Additional water requirement if available	Total Required
