

## Newsletter to Barossa Infrastructure Ltd Customers

4 February 2022

### *Temporary Additional Water*

If you require additional water this Water Year, we have some available. Please fill in this [Temporary Additional Water](#) form and return it to Neville at [Neville@BIL.net.au](mailto:Neville@BIL.net.au).

### *Water Quality*

The water quality from the Warren Reservoir is currently poor. BIL and SA Water have explored options to improve it, but until SA Water undertakes their reservoir upgrade project there is little that can be done.

SA Water has now committed to undertaking the Warren Reservoir upgrade in the winter of 2023.

### *Additional Water To The Region*

Over the last 18-24 months, BIL has been investigating a number of new water sources. All are expensive and will need Federal and/or State government financial support to fund their construction. Government financial support is usually contingent on a detailed business case showing the net benefit to the regional, state and national economy.

Separate to this, the Department of Primary Industries and Regions (PIRSA) engaged engineering consultant KBR to prepare a detailed business case for the supply of water to the Eden Valley as well as the Barossa Valley floor. Recycled water from Bolivar is included in those considerations. KBR has developed concept designs and preliminary costings. KBR is currently requesting interested parties complete a 'Round Two Demand Assessment' for future water requirements over and above your current BIL water entitlement.

KBR has asked that we notify our customers of their current Demand Assessment process. Whilst many will be aware of the process, in the event you are not and would like copies of the briefing pack and non-binding demand response forms, please contact Angus MacDonald from KBR ([angus.macdonald@kbr.com](mailto:angus.macdonald@kbr.com) or 0488 444 973) for the documents, which they wish to receive by 11th February 2022.

If you have any questions of BIL, please call.

### *Contact for BIL Operations*
