

Newsletter to Barossa Infrastructure Customers

BIL Water Prices for 2012/2013 Water Year are:

SA Water have advised a price increase of an average 4.7% and consequentially in accordance with the customer contract BIL prices are increased by the same amount. Price increases are provided in the water transport agreement and reflect increases in an index and power prices. This year's increase does not include any amount for the carbon tax as it is based on the previous year's electricity price for pumping.

The revised prices from 1 October 2012 are:

Premium Water	74 cents per kilolitre	Spot	124 cents per kilolitre
Off peak	94 cents per kilolitre	Excess water	370 cents per kilolitre
Not taken	49 cents per kilolitre		

Barossa Infrastructure Web Site

www.BarossaInfrastructure.com.au is the BIL web site and it is used to keep customers updated on water quality and service issues. It will also provide general information on the Company.

Temporary Trading of BIL Water in 2012/13

Customers who have either surplus water or additional water requirements should register their requirements on the attached form. BIL will advise customers of water trades on a first come basis.

BIL looks to the Future - "Operation Infill"

The option for expanding the water transport agreement with SA Water expires in 2015. The plan, Operation Infill, is to take this last opportunity and look at the feasibility of expanding the scheme by 1,000 ML by 2015. Greater volumes will lead to reduced prices, as the mainly fixed costs of the company are spread over up to 8,000 ML of water rather than 7,000ML – the current limit. We are embarking on 'Operation infill'; selling water to those who are not currently customers, rather than looking to new plantings.

BIL has recently placed advertisements in the local press inviting registrations of interest in joining the scheme. New customers will fully fund all costs and there will be no detriment for existing customers. Full details are on the web site.
