27 April 2022

### *Possible Temporary Interruption to Supply, 2<sup>nd</sup> to 6<sup>th</sup> May 2022*

SA Water has made significant changes at Fromm Sq (the interface between SA Water's pipeline and BIL's pipeline). SA Water will be able to supply water to BIL from either:

- the Warren reservoir, which is our normal supply;
- their clean water network, which has occurred the last few winters. The pipes from the clean water network have been upsized, allowing a higher flow rate; or
- a combination of both. This functionality is new.

These changes provide SA Water greater flexibility and BIL greater reliability.

Commissioning of those changes will occur next week, 2<sup>nd</sup> to 6<sup>th</sup> May 2022.

The commissioning process will require Fromm Sq valves to be opened and closed, and so it is possible that there will be temporary interruptions to your BIL water supply during this time.

BIL's operations contractors will be at Fromm Sq throughout commissioning to respond immediately to any issues, minimising any water supply disruptions.

Please call with any concerns, either beforehand or during commissioning.
