Dear Simon

Please find attached the Final Analytical Report for

Customer Service Request: 122622-2020-CSR-1
Account: 122622
Project: AWQC-152996 Barossa Infrastructure Ltd - Routine 20/21

This report has also been sent to: Neville Skipworth

AWQC Sample Receipt hours are Monday and Tuesday 8:30am to 8pm and Wednesday, Thursday and Friday 8:30am to 4:30pm.

Yours sincerely,

Brendan Walsh

Notes

- The last figure of the result value is a significant figure.
- # determination of the component is not covered by NATA Accreditation.
- ^ indicates result is out of specification according to the reference guideline. Refer to report footer.
- * indicates an incident has been recorded against the sample. Refer to report footer.
- & Indicates the results have changed since the last issued report.
- The Limit of Reporting (LOR) is the lowest concentration of analyte which is reported at the AWQC and is based on the LOQ rounded up to a more readily used value. The Limit of Quantitation (LOQ) is the lowest concentration of analyte for which quantitative results may be obtained within a specified degree of confidence.
- Where collection type is AWQC Collect, NATA has confirmed that due to a robust system in place for maintaining the temperature integrity for samples collected by AWQC's Field Laboratory Services, the recording of temperature when samples arrive at the AWQC is out of scope.
- Where applicable the [Measurement of Uncertainty](https://www.awqc.com.au/our-services/analytical-services/measurement-uncertainty) is available at <https://www.awqc.com.au/our-services/analytical-services/measurement-uncertainty>.
- If pH has been tested then the pH will be outside of its holding time unless measured in the field.
- (ADEL) indicates analysed in Adelaide, (MELB) indicates analysed in Melbourne.
