Newsletter to Barossa Infrastructure Customers

High Water Demand

For the second year we are experiencing a very high water demand. This has resulted in scouring of the pipe of dirt and slimes deposited over the winter. We apologise for this 'dirty' water. It is function of our raw water supply.

Temporary Trading of BIL Water in 2013/14

BIL has obtained a limited supply of additional water. This can be purchased at the Premium Water price of \$780 per Megalitre. Customers who have surplus water requirements should also register their water to avoid paying unused water charges. Please use the attached form. BIL will allocate water trades on a first-come basis. This will be shown on your next water account. If you need to confirm the trade please ring the office.

Scheme Expansion

We have received a verbal response from SA Water and expect their written offer by the end of February 2014. This is expected to then allow new contracts to be signed for the 2014/2015 water year.

Incorrect Billing

In the December 2013 invoice last year's price for water was incorrectly charged. The correct rate is \$40/ Megalitre higher than charged. The difference will appear in your February invoice. For your information the rates for 2013/14 water year are:

Premium Water	78 cents per kilolitre	(\$780/ML)
Off peak	98 cents per kilolitre	(\$980/ML)
Not taken	50 cents per kilolitre	(\$500/ML)
Spot	134 cents per kilolitre	(\$1,340/ML)
Excess water	390 cents per kilolitre	(\$3,900/ML)
