Newsletter to Barossa Infrastructure Ltd Customers

Advance Warning – System Closure – Week Commencing 13 October 2015

To enable upgrading the Fromm Square Isolation Valve and a number of Pressure Reducing Valves, the system will be shut down for approximately 5 days during the week of 13 October 2015. I apologise for the disruption. Further advice will be given once the exact dates are confirmed.

Price Reduction for 2015/2016 Water Year

SA Water have advised a substantial reduction in the price of electricity for the 2015/2016 water year commencing on 1 October 2015. An automatic price decrease is provided in your Customer Contract, as a result of the price variation advised by SA Water (in this case a decrease of 10% in SA Water’s price).

The new prices from 1 October 2015 are:

	2015/16 Cost (\$/ Kilolitre)	2015/16 Cost (\$/ Megalitre)	2014/15 cost (\$/ Megalitre)
Premium	0.72	720	800
Off Peak	0.92	920	1,000
Not taken	0.48	480	500
Spot	1.25	1,250	1,350
Excess water charge	3.60	3,600	4,000
CWMS Premium	0.65	650	730
Cwms Off Peak	0.85	850	930

BIL is now on Filtered Chlorinated Water

Due to the low level of the Warren Reservoir, BIL is being supplied from the Swan Reach-Stockwell pipeline with filtered chlorinated water from Tuesday 1 September. There may be some water quality issues as the chlorine kills off some of the slimes inside the concrete lined pipes. This is expected to continue for up to 6 weeks.

BIL Water Year

The 2014/15 BIL water year ends on 30 September 2015. The meters will be read on 1 October 2015. An explanatory sheet is enclosed.

Temporary Trading of BIL Water in 2014/15 and 2015/16

There is no additional water available in the 2014/15 water year. At this stage, trading is only available between customers for the 2015/16 water year. BIL has no additional water due to the dry season and its impact on SA Water storage levels. Customers may register their requirements, which will be treated on a first come basis if water becomes available.
